Tanker Default Type?	
Default Fitting Type and size for hose hookup to pump-out?	
Heated Tanker?	
Default Connection?	
Government Load?	
Cert Clean Tanker?	

*Important! Please be sure containers being shipped are staged and readied for pickup in one location for jobs not involving a lab pack or pump-out being performed by ADCO personnel. Containers being shipped must be clean, free of rust and dents, and must seal so in the event a drum or container was to fall over while in transit there will be no spillage.

We ask that all waste be readied for shipment in one location of the building where pickup is being performed and that waste be moved to the shipping / receiving area as we try to minimize our employees' possible exposure to Covid 19 by not having our staff enter a client's building as much as possible. If you have any questions or comments, please feel free to contact ADCO at: (708) 429-1660.
